

WORKING AT HEIGHTS LIFELINE SYSTEM

Same kit, every scenario
30 second rescue plan
Simple operation

Controlling the risk.

PATENT 9,956,436

ROPER SYSTEM

GOOD
DESIGN
AWARD
BEST IN CLASS

The Roper System® is a simple, multipurpose, shock absorbing system controlled from either end, to raise or lower at any time with an integrated 30 second rescue plan, greatly reducing costs and associated risks.

Sophisticated Australian design with an international patent, the engineered Roper System® is the safest, most practical, time and cost effective working at heights lifeline system.

SAME KIT EVERY SCENARIO

By using one system for every scenario users will be safer & more familiar with its operation. A higher level of competency can be maintained, reducing risk of an accident caused by misuse.

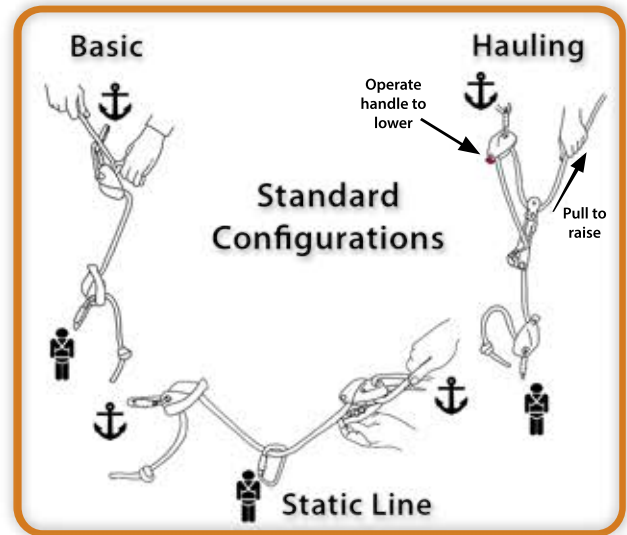

30 SECOND RESCUE PLAN

Operators are already on the rescue system, ensuring a rapid response in any crisis.

SIMPLE DESIGN

Simple design means ease of operation and greater willingness to use, enhancing your safety culture.

An engineered system is essential to ensure all components are compatible. Engineered with 37 years' industry knowledge and experience. Roper System, controlling the risk.

By using the Roper System® - your due diligence ensures your "Workers [are] given **the highest practical level of protection** to their health and safety from hazards and risks arising from work."

(Safework Australia) Derived from WHS Act s27.
